The product needs a safety surface

This play centre with three platforms, two slides and several climbing elements is suitable for creative play and exploration. Stairs with handrails lead to the lower platform that contains a Tic-Tac-Toe game, a clock panel and a slide. A rock climbing wall or a net sloping wall lead to the higher platforms. The highest platforms are connected by a balance bridge with handrails and moving steps. From the higher platforms, a slide and a fireman's pole offer a way for reaching the ground. Two different climbing walls offer a way to test one's strength. A fun play corner with a bench can be fitted with either kitchen or car dashboard elements. The side panels of the play centre can be switched for various activity walls or thematic printed panels.
