The product's painted profile posts made of laminated timber are concreted into the ground using hot-galvanized metal tubular fittings.

This fun and versatile play centre satisfies all climbing needs and offers a countless number of ways to develop dexterity, strength, courage and balance skills. Different ladders offer access to the three platforms. Two of the platforms are connected by a balance bridge with moving steps and beneath them are two nets for swinging. The centre offers exercise equipment to help develop dexterity, strength, balance and coordination (a horizontal and a vertical net wall, a horizontal ladder, monkey bars with handles, a climbing wall with holes, several climbing ropes, a shifting balance beam, and balance stands). An extra wide slide and a fireman's pole offer ways for sliding down.
