This play centre with its four platforms, three slides and several additional elements is well suited for diverse activities. The lower platforms are suitable for toddlers, come with stairs with handrails and are connected by securely lined paths. Platform sides are decorated with a Tic-Tac-Toe game, rotating elements and an alphabet learning panel. Both of these platforms come with a slide. The higher platform can be reached via a rock climbing wall or a net slope. The two higher platforms are connected by a crawl tunnel. A fireman's pole and a slide offer a way down from the higher platforms. Two different climbing walls offer to test kids' dexterity and strength. A fun play corner with a bench, which can be fitted with either kitchen or car dashboard elements, offers an extra level of joy. The side panels of the play centre can be switched for various activity walls or thematic printed panels (animals, birds, fish, trees, berries, etc.). The design of the panels will be finalised with the client during ordering.
