The product's painted profile posts made of laminated timber are concreted into the ground using hot-galvanized metal tubular fittings.

A play centre with three platforms, two slides and several balance elements. A small ladder leads to the lower platform, where the kid can enjoy a fun slide down the chute, and where a balance bridge with moving steps leads to the higher platform. There a crossroads awaits: the kid can slide down a fireman's pole or head to the net bridge with handrails that leads to the next platform, where they can dash down the other slide. An arched bridge with rock climbing handholds leads to the higher platform and there is a rock climbing wall, which helps improve dexterity skills. A captain's helm, binoculars and a Tic-Tac-Toe game, as well as a play corner with a bench, which can be fitted with either kitchen or a car dashboard elements, satisfy all role playing needs. The side panels of the play centre can be switched for various activity walls or thematic printed panels (animals, birds, fish, trees, berries, etc.). The design of the panels will be finalised with the client during ordering.
