The product's painted profile posts made of laminated timber are concreted into the ground using hot-galvanized metal tubular fittings.

This play centre with its two platforms, a slide and several climbing elements is well suited for diverse activities. The platforms can be reached via a ladder or a net slope and they are connected by a balance bridge with moving steps. A fireman's pole and a slide offer a way down from the platforms. A small play corner and a clock panel add an extra layer of fun. Six different climbing walls, a net wall and horizontal ladder with helpful handholds offer to test the kids' dexterity and strength. The side panels of the play centre can be switched for various activity walls or thematic printed panels (animals, birds, fish, trees, berries, etc.). The design of the panels will be finalised with the client during ordering.
