The product needs a safety surface

A play centre with a platform, two slides and climbing elements. A ladder and a climbing wall lead to the lower platform where a slide and a fireman pole offer a path down. A net bridge with handrails leads to the platform with a roof and to the second slide. The highest platform can be reached via a rock climbing slope. A moving helm and binoculars, as well as a fun play corner with a bench, which can be equipped with either kitchen or car dashboard elements, satisfy all role playing needs. The side panels of the play centre can be switched for various activity walls or thematic printed panels (animals, birds, fish, trees, berries, etc.). The design of the panels will be finalised with the client during ordering.
