Throughout the ages the starry skies have captivated people with their mystery and endlessness. Why do the stars seem so tiny? How does the moon wax and wane? How big is space? What does the Big Dipper dip? Which constellation was I born under? Children's questions will never cease, but their dreams will be boosted by Zodiac range products, because that starry-eyed tike who's climbing on a net, sliding down or exploring the world through a porthole might be a future astronaut or astrologer.
